5X1		Release 2003/09/13 CIA REPT/9804790A000600070009-1
MISSION NUMBER	DATE FLOWN	MPIC FIRE HIGHLIGHTS 13 SEP - 12 OCT 1973  REMARKS 25X1
5X1 GA-010 5X1 GA-013		mission confirmed the presence a Soviet F class submarine and a KANIN class destroyer in Mariel harbor. A large pedestal mounted parabolic antenna (about 40.5 feet in diameter) was seen at the Tapaste Comsat ground station, located about ten miles southeast of Havana which will provide additional communications links between Cuba and the USSR. The mission aborted 1 1/2 hours early because a power interruption at Guantanamo Naval Station prevented positive radar flight following of the U-2.
		2. The October mission was tasked to ascertain if military offensi weapons were being emplaced in the vicinity of the Guantanamo Nav Station. Readout of mission photography disclosed that 12 drive-th revetments and nine artillery revetments have been constructed new Guantanamo since the OLYMPIC FIRE mission 25%  3. As of 12 October the USIB requirement for 90% of Cuba to be photographed quarterly showed of the area covered. By 25% 1 December, if no missions are flown during November, the quarterly requirement will stand at 25%
